

## Grand Village Emergency Operations Plan

Grand Village believes the more we all know about our emergency operations plan, the better prepared we can all be in the event of an emergency.

In the event of an emergency, Grand Village will have a communications designee that will call the primary emergency contact of each resident to keep them updated on the situation and any pertinent information regarding their loved ones status. It is the responsibility of the primary emergency contact to notify and relay the information to family and friends. As you can image, during an emergency staff time is critical and needs be focused on communicating with each residents' primary contact. If you are the primary contact, thank you in advance for your help in reducing inbound calls during an emergency.

The following is a summary of our emergency operations plan. The entire plan can be found in our "Survey Binder" outside the Activities Center at Grand Village. We will also provide copies upon request to residents, families, volunteers and visitors.

### Emergency Operations Plan Summary
